Summary

With over 5 years of hands-on experience in JavaScript and PHP, I specialize in building scalable, performant, and user-centric web applications. My journey spans developing robust back-end services in PHP (Laravel) and crafting interactive, modern front-ends using JavaScript (React, Vue, Node.js).

I'm passionate about clean code, efficient architecture, and continuous learning. I've worked across startups and growing teams, contributing to full project lifecycles from concept and design to deployment and maintenance. Whether it's optimizing API performance, building dynamic UI components, or integrating third-party services, I bring a problem-solving mindset and a strong sense of ownership.

Looking to connect with like-minded engineers, product teams, or companies building impactful digital solutions.

Experience

- | | |
|--|---|
| Frontend Developer, Yaakyi | 06/2025 – Present
